

## Integração via Webhook

### 1 – Habilitando e Configurando PBX uTech;

- Habilite a chamada a Webhooks de integradores **(1)**;
- Habilite o uso de Endpoint padrão **(2)**;
- Especifique a Url do Endpoint **(3)**;
- Selecione o método da Requisição **(4)**.

The screenshot shows the uTech configuration interface. At the top, there is a navigation bar with the uTech logo, a menu icon, and user information (Monitoramento, Servidores, rafael). Below this is the 'Configuração' section with a horizontal menu of tabs: Geral, Rede, Avançado, Gravação, Analytics, Email, SMS, Bilhetagem, Alta Disponibilidade, Portabilidade, and Integrações. The 'Integrações' tab is selected. Underneath, there are sub-sections for 'Google Maps' and 'Chave da API'. The 'Web Hooks' section is active, showing 'Habilitar chamadas aos webhooks de integradores' as 'Habilitado' (1). Below that, 'Habilita Endpoint padrão' is also 'Habilitado' (2). The 'URL do Endpoint' field (3) contains 'https://webhook.site/0e15107b-8868-471e-94dd-6cfaa0833018'. The 'Tipo de Requisição' dropdown (4) is set to 'POST'. A 'Salvar' button is located at the bottom right.

### Início da Chamada:

```
{
  "callid":"1523900166.193",
  "event_type":"originate",
  "exten":"2011",
  "number":"4832717400",
  "call_type":2
}
```

### Final da Chamada:

```
{
  "callid":"1523900166 .193 ",
  "event_type":"finish",
  "exten":"2011",
  "number":"4832717400",
  "call_type":2,
